

We are searching for a **Senior Director, Program Management** to join our team in Cambridge, MA!

QurAlis is bringing hope to the ALS community by developing breakthrough precision medicines for this devastating disease. Our stem cell technologies generate proprietary human neuronal models that enable us to more effectively discover and develop innovative therapies for genetically validated targets. We are advancing three antisense and small molecule programs addressing sub-forms of the disease that account for the majority of patients. Together with a world class network of thought leaders, drug developers and patient advocates, our team is rising to the challenge of conquering ALS.

Our team consists of the very best in class researchers, industry veterans and clinicians. QurAlis has already won two Golden ticket awards and receives strong support by a syndicate of institutional and strategic investors. We maintain solid partnerships with clinical, science and patient organizations to ensure our success in bringing a meaningful therapy to ALS patients.

We believe in our core values of:

- Success
- Innovation
- Excellence
- Collaboration
- Empathy
- Drive

Senior Director, Program Management: We are seeking a motivated and experienced program manager with a strong science background to oversee the transition of our discovery projects into clinical trials. The individual in this position will be responsible for timeline management, risk assessment, risk mitigation planning, and cross-functional communication in a largely externalized environment.

Responsibilities:

- Create alignment across multiple functional areas including Discovery Biology, Toxicology, DMPK, CMC and Regulatory Affairs.
- Develop project objectives, plans and timelines with particular focus on assumptions and interdependencies.
- Asses key risks and develop strategies for risk mitigation.

- Maintain control on established scope, budget and timelines.
- Communicate deliverables, timelines and risks to the organization.
- Manage interactions with the NIH and FDA.

Qualifications:

- 5-10 years of program management experience.
- Prior interactions with the NIH and FDA.
- Strong work ethic and professional attitude.
- Knowledge and understanding of drug discovery, as well as non-clinical and clinical development processes including ICH guidelines.
- Detail-oriented.
- Excellent interpersonal skills.
- Excellent written, oral, and presentation skills.
